Statement of Policy

Gentry Machine Works, Inc. is a family owned business established in 1950 to supply replacement gears to the textile industry. From its modest beginnings as a one man operation, it has expanded its business base to include all types of general machine work in addition to its specialty in gear production. Industries served include but are not limited to, foundries, sawmills & planing mills, boiler manufacturers, automotive power train components, box & container manufacturers, foundries, aircraft manufacturers, and bakery & cookie manufacturers. We added a professional engineer and structural steel fabrication dept in 2001. The company is located in the East Columbus Industrial Park at 5110 Transport Blvd., Columbus, Georgia. The facility has 32,000 sq. ft of shop floor space and 2400 sq. ft. of office space.

It is the policy of Gentry Machine Works, Inc. to provide quality precision machined parts to customer requirements at competitive prices and to deliver the product as required by the customer's schedule. Procedures and instructions have been established in a Quality Control manual to ensure compliance with the policy. The quality program has been designed to meet and/or exceed the requirements contained in MIL-I-45208. Gentry Machine Works, Inc. can provide service from the repair of broken or worn parts to production machining of parts for OEM's. Our equipment consists of engine lathes and vertical mills to CNC machines such as a Mazak 8N Quick Turn to a Mazak FH6000 Horizontal Machining Center. Our fabricating shop consists of brakes and shears, plate and angle rolls, plasma plate burning machine, all types of welding equipment, and sub-arc welding.

We at Gentry Machine Works, Inc. would like to extend an invitation for you to visit our shop and give us the opportunity to do work for you.

KEY BENEFITS

1. Stock Parts

We will keep critical parts in our inventory to keep your down time to a minimum

2. Modifications

We have the experience and capability to work with you to make modifications. Modifications may include suggestions by engineers to improve the design.

3. Location

Our close proximity to your plant allow us to provide fast and accurate service.

4. Machinery and Equipment

With our modern CNC machines and full service fabrication department, we have the machines to make all of your OEM replacement parts.

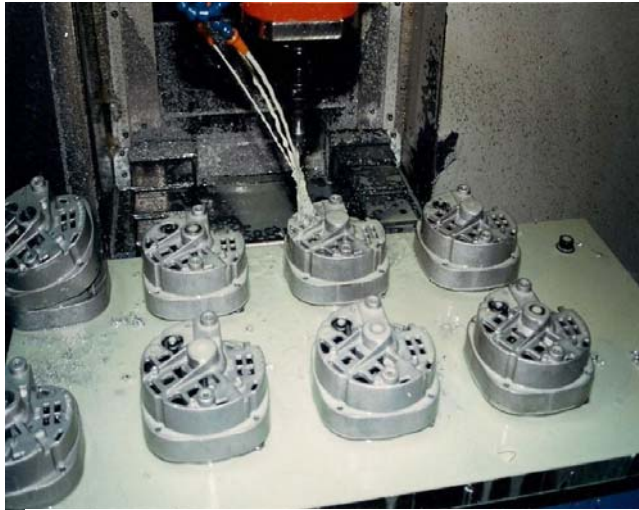

5. Experience

With over 50 years in the machine shop business, we have the experience and dedication to meet our customer's needs.

Reverse Engineering

Send us a new or used sample and we will provide an attractive quotation. We reverse engineer Original Equipment parts using state-of-the art equipment. Parts are meticulously measured and tested for dimensions, hardness, surface finish and material content. All parts are blueprinted on our computer aided design system.
